

ISIE 2007 – IEEE International Symposium on Industrial Electronics
June 4-7, 2007, Centro Cultural & Centro Social Caixanova, Vigo, Spain

Special Session on

**Applications of Nonlinear Control Design Techniques
in Power Electronics**

organized by

Gerardo Escobar (gescobar@ipicyt.edu.mx)

Call for Papers

Topics of interest include, but are not limited to:

- control of multilevel converters
- control for power quality applications
- control for renewable energy systems
- control of distributed generation nets and their connection to the grid
- digital control for switch mode power converters
- control of power electronics systems using nonlinear techniques such as adaptive control, parameter estimation, nonlinear observers, repetitive control, passivity based control, etc.

Submission procedure and deadlines: The same as for regular papers.

All the instructions for paper submission are included in the conference website:

<http://www.dte.uvigo.es/isie2007>
